

Dodecahedron Calendar

A three-dimensional shape having twelve plane faces, in particular a regular solid figure with twelve equal pentagonal faces.

Print on card stock. Cut out the figure and flaps down to the center pentagon. Lightly score each fold. Begin gluing one side to another allowing the glue to dry on each flap before moving on. Leave one side unglued. This will make it easier to manipulate the folds with your fingers. Continue connecting the top and bottom halves in the same manner, one flap at a time.
